

Dear Surveying Professional,

I have sunk my teeth into a surveying and mapping career and like a dog with a bone snatched from its grasp, I am eager to continue my training and await the chance to utilize my abilities in following my passion for surveying.

I am inquiring for a position within your firm as a survey technician and await the opportunity to showcase my work ethic. As of now I have received a Bachelor's degree in Geomatics from the University of Florida, passed the NCEES Fundamentals of Surveying Exam for licensure, and accumulated valued hands-on experiences covering a wide range of surveying methods. Looking for the opportunity to hone in on the techniques and skills utilized by the industry, I am in search of an environment where my professionalism can flourish.

I am available for interview almost any time and can be reached at (352)871-2634. My email address is [adam@depthsofobscurity.com](mailto:adam@depthsofobscurity.com).

Sincerely,

Adam Zettlemyer
